Document	DASS Project Concept Document
Creation date	26-01-2023
Created By	Amey,Aditya,Meghana,Nikhita
Client	Product Labs(Koushik Ananth)

Description:

The Casual Labour Job Finder In Vernacular project is a platform that connects casual laborers with Job posters in their local area. The platform is designed to be accessible to users who may not speak English as their first language. The platform provides a range of job listings, including manual labor, construction, and other temporary work opportunities. Users can search for jobs based on location, type of work, and other criteria. The goal of the project is to make it easier for casual laborers to find work in their local area and to improve their employability.

Profile of Users:

1. Job Seeker:

A job seeker is an individual who is looking for employment in a manual labor or skilled trade position. They may be looking for full-time, part-time or temporary employment in their field. They shall be listing out their requirements for the job in their vernacular language by calling a toll-free phone number and would get an answer regarding job vacancies suited to them back in vernacular in the same session. The job seeker can show interest in jobs which they like.

2. Job Giver:

A job giver is an individual or a company which is seeking to employ individuals in manual labor or skilled trade positions.The job giver will post an application regarding hiring people in different positions. They shall be asked for details like type, location.etc. If someone is interested in the job, the employer gets notified about the same and gets their details, after which they can contact them about employment.
